Public Service Training in a Nutshell

PSTachio is a web application to track regional Public Service Training classes. Track students, instructors, and other users, class enrollment and completion all on one site.

Need reports on a particular class, student, or instructor? Maybe an annual summary report showing enrollment numbers by department? **PSTachio** makes it only a click away.

When training is complete, **PSTachio** also assists in creating certificates and CPR cards for students to mark their success in the class.
